

GRID : GitHub Repository Introduction and Documentation

Nama : Danisa Putri Khalisya

NIM : 255150300111025

Program Studi : Teknik Komputer

1. Langkah pertama membuat akun

The image displays two screenshots of the GitHub sign-up process. The top screenshot shows the initial sign-up page with options to continue with Google or Apple, and input fields for Email, Password, and Username. The bottom screenshot shows the same page after filling in the details: Email (ddanisa.putri@gmail.com), Username (DanisaPutri0), and Country (Indonesia).

Penjelasan

Masuk ke <https://github.com> membuat akun GitHub menggunakan email aktif.

2. Langkah kedua membuat repository pribadi yang dapat diakses publik

Penjelasan

Tekan tombol + di bagian kanan atas lalu klik “New Repository” ,isi nama repository dengan “INTRIVIA”, bagian deskripsi dengan “Pemenuhan Tugas INTRIVIA 2025”, Buat Repository.

3. Langkah ketiga melakukan push file menggunakan command prompt

The screenshot shows the Git website's 'Download for Windows' page. The page lists various download options for Windows, including standalone installers and portable versions. A text editor window is open over the page, containing the text: 'Nama : Danisa Putri Khalisya' and 'NIM : 255150300111025'.

Below the website screenshot, a Command Prompt window is shown with the following commands and output:

```
Microsoft Windows [Version 10.0.22631.5624]
(c) Microsoft Corporation. All rights reserved.

C:\Users\karyo>git config --global user.name "DanisaPutri0"

C:\Users\karyo>git config --global user.email "ddanisa.putrie@gmail.com"

C:\Users\karyo>
```

A second text editor window is open over the Command Prompt, containing the same text as the first: 'Nama : Danisa Putri Khalisya' and 'NIM : 255150300111025'.

At the bottom, a commit history table is displayed:

Commit Message	Author	Date	Commits
"DanisaPutri0 Menambahkan file .pdf"	7caca30 · yesterday	1 Commit	
Cluster 2_Kelompok 7_IoT_JUDUL PROJEK.doc...	Menambahkan file .pdf	yesterday	

Penjelasan

Download git di <https://git-scm.com/downloads>, membuka Command Prompt di desktop anda, dan lakukan konfigurasi Git, buat folder, dan lakukan push
